

The Kistler Group

Headquartered in Winterthur, Switzerland, the privately-owned Kistler group of companies operates throughout the world. Now known as Kistler Instrumente AG, the very first entity in the holding company was established at Winterthur over 50 years ago. The group has grown continuously ever since then. Nowadays, Kistler is the global market leader in dynamic measuring technology with a group comprising 30 companies at 52 different locations and some 1,400 employees worldwide.

Our technology measures pressure, force, acceleration and torque. Our instruments are used to measure and analyze physical processes, control industrial processes and optimize products. Our product offering is used in engine development and monitoring, vehicle technology, plastics processing and metal machining, as well as assembly and testing technology.

Customer-focused services such as calibration, repairs or regional product adaptations are provided by Kistler Tech Centers in Germany, the US, China and Japan.

The Kistler Group's success is underpinned by a business model that is consistently implemented, together with a shared understanding of values
